

# Mercury pollution in India: Emissions, current data and future plans

September 10, 2013

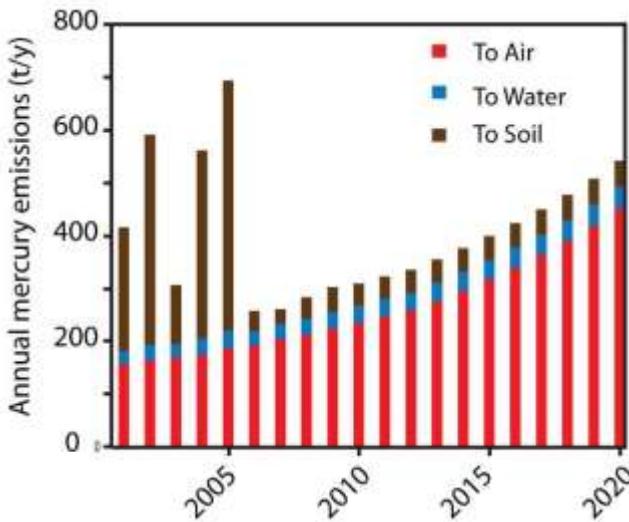

Asif Qureshi,

Assistant Professor, IIT Hyderabad

## India

- Major mercury emitter
  - Increased energy demands. = more coal
  - Increased metal production
  - Consumer products: health care, personal, household and electronic goods

## Emissions projections

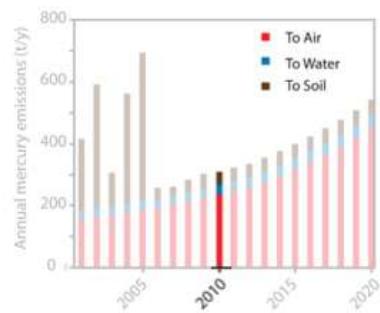

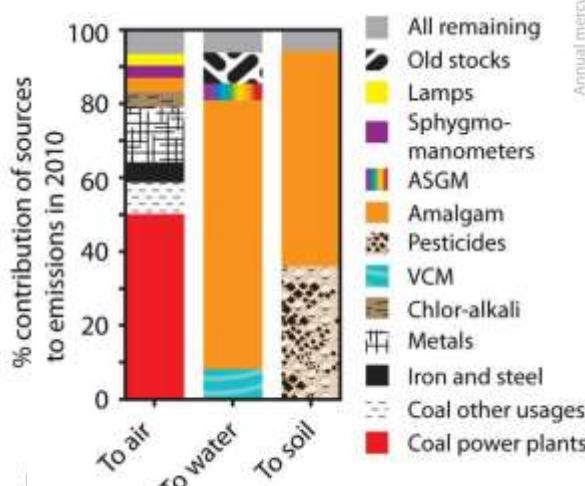

(estimates from a material flow analysis)

Chakraborty et al. (2013) *Environ. Sci. Technol.*, 47, 8105-8113.

3

## Major sources

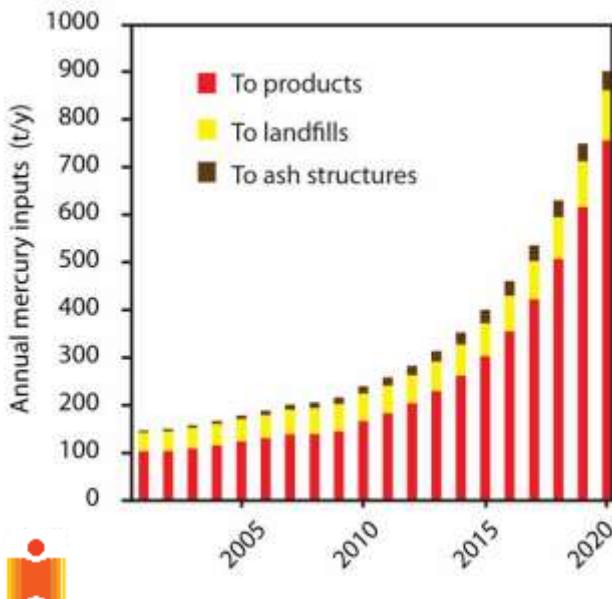

Note: large uncertainties exist

Chakraborty et al. (2013) *Environ. Sci. Technol.*, 47, 8105-8113.

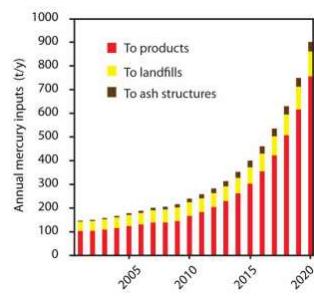

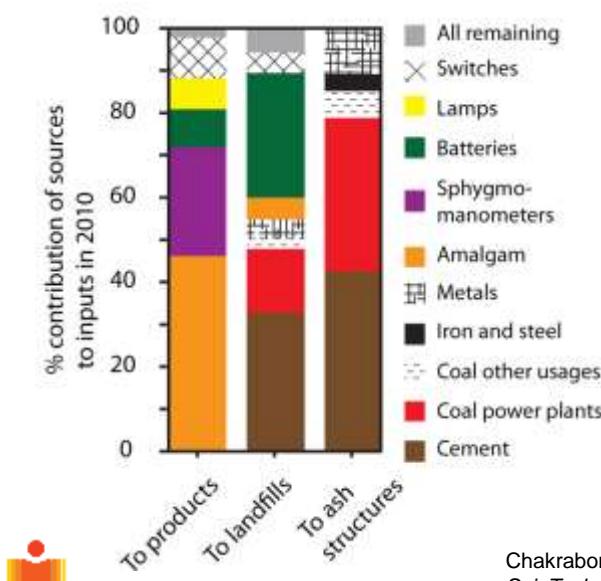

4

## Mercury in stocks

5

## Mercury in stocks

Chakraborty et al. (2013) *Environ. Sci. Technol.*, 47,8105-8113.

6

## Possible mercury emission locations

Thermal  
plants

<http://www.mapsofindia.com/maps/in dia/thermalpower plants.htm>

7

## Possible mercury emission locations

Zinc mines

Steel plants

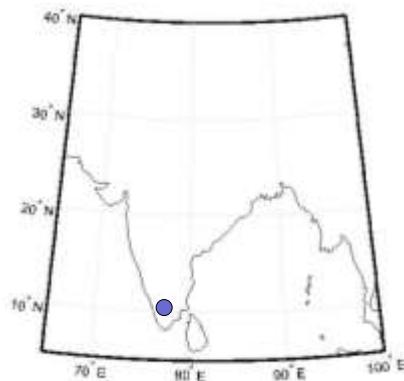

[www.portal.gsi.gov.in](http://www.portal.gsi.gov.in); <http://www.steelonthenet.com/maps.html>

8

## Mercury in environmental media: current

- Air:
  - Appears one site only (GMOS) ●

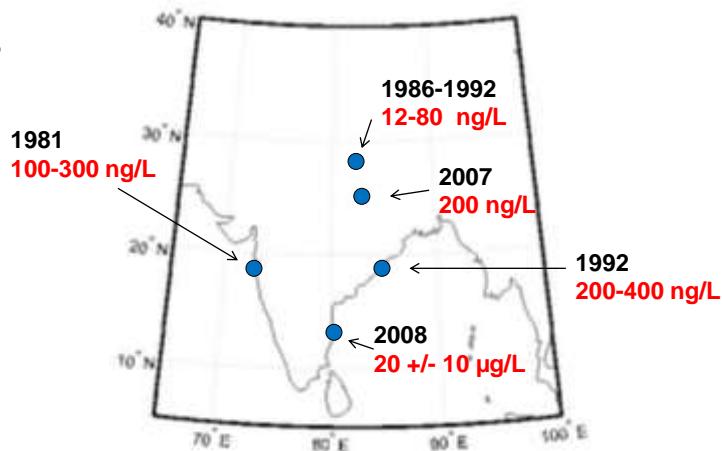

[www.gmos.eu](http://www.gmos.eu)

9

## Mercury in environmental media: current

- Air:
- Water ●

Zingde and Desai, 1981; Sinha et al 2007; Panda et al 1992; Satpathy et al 2008

10

## Mercury in environmental media: current

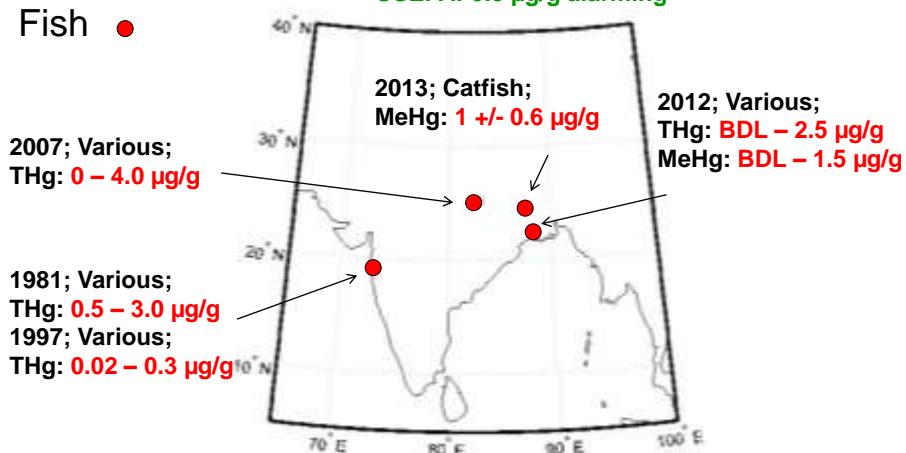

- Air
- Water
- Fish ●

Prevention of Food Adulteration Act (1954)

THg: 0.5 µg/g ww

MeHg: 0.25 µg/g ww

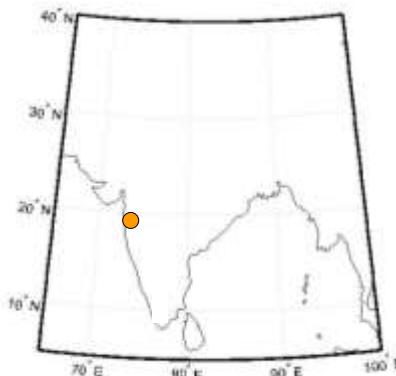

USEPA: 0.3 µg/g alarming

Zingde & Desai, 1981; Sinha et al 2007; Pandit et al 1997; Pal & Ghosh, 2012; Pal et al 2013

## Mercury in humans

- Air:
- Water
- Fish
- Human ○

- ❖ 6-12 fish meals per week
- ❖ THg in Hair: 5 – 9 µg/g on average
- ❖ 20-30% people in some areas have > 10 µg/g

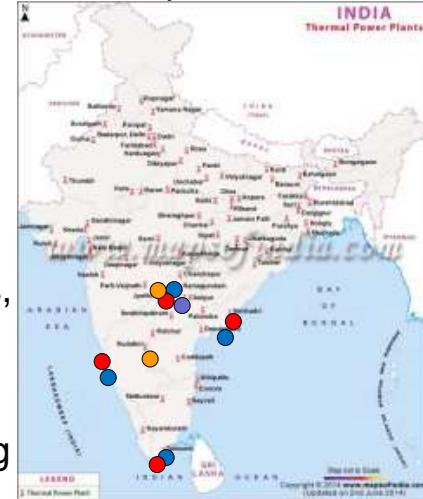

Menon & Mahajan, 2012

12

## Next: Measure and Model

- Air monitoring: urban & rural ● TGM only
- Biota: coastal ●
- Human ●
  - Priority groups
- Environment: soil, sediments, water ●
- Obtain system understanding

13

# Thank you

- VEA, EPAT, USEPA
- Audience
