

North American Update, #2

David Gay

New Mercury Deposition Network Sites (MDN, wet deposition)

NADP's Mercury Networks (AMNet & MDN)

Proposed: Estimate Dry Deposition at AMNet Sites

- Weekly GOM, PBM, and GEM (downward)
- flux (F) = air concentration \times dry deposition velocity (V_d)

$$F = V_{\text{deposition}} * \text{Concentration}_{\text{air}}$$

where:
$$V_d = \frac{1}{R_a + R_b + R_c}$$

- R_a as aerodynamic resistance, R_b as quasi-laminar resistance, and R_c as canopy resistance

★ Total Deposition Of Mercury
